SUBJECT INDEX - VOLUME 21

Adrenal rhythms, development of, 433
Adrenocorticotropin, effect on plasma androgens and LH, 553
Aging, prostatic androgen receptor activity in rat, 801
Aldosterone, binding to proteins, 383, 397
    mechanism of action, 383, 397
Aldosterone-^{3}H, complex formation in kidney and liver, 383
Aldosterone Metabolism, sex dependence, 397
Androgen, bioconversions, 17
    metabolism of, 307
Androgens, 27
    identification of Δ^{5}-7-substituted derivatives, 65
    inhibition of, on serum FSH and LH levels, 703
    metabolism of, *in vivo*, 773
    synthesis of Δ^{5}-7-19-disubstituted, 47, 65
    testicular, on human prostatic DHEASO$_{4}$ase, 646
Androgen binding protein, in the testis cytosol fraction of adult rats, 457
5α-Androstan-3α,17β-diol, 27
Androstenedione, plasma levels, response to HCG, 583
Androst-4-en-3,17-dione, radio-immunoassay, 111
Androst-4-en-17β-ol-3-one, binding to human pregnancy plasma proteins, 423
    mass spectrum of, 735
    metabolism by rat prostate, 537
Androst-4-en-17β-ol-3-one-11α-Hemisuccinyl, mass spectrum of, 735
Androst-5-en-3β,17β,19-triol-7ξ-acetate, synthesis of, 65
Androst-5-en-3β,7α,19-triol-17-one-3β,19-diacetate, synthesis of, 47
Antibodies, linked to insoluble support, 1
    to progesterone and 17-hydroxyprogesterone, 847
Aromatic Steroids, benzylic oxidation of, 457
    ring oxidation of, 457
6-Aza-B-homo-5α-cholestan-7-one, mass spectra of, 181
    -3β-acetoxy, 181
    -3β-chloro, 181
    -3β-bromo, 181
    -3-oxo, 181
11-Aza steroids, synthesis of, 147, 361
11-Aza-9α-steroids, synthesis of, 361
11-Aza-9β-steroids, synthesis of, 147

Bile Acids, in adult rat brain, 633
Biological Drug Assay, of prednisolone, 833
Brain, adult rat, 3α-hydroxysteroid dehydrogenase in, 633
    incorporation of radioactive steroid, 219
    steroid extraction from, 219

Carboxymethoximino Derivatives, of 17-Ketosteroids, 723
Cholestanyl-3β-acetate-5α,6β-dibromide,
exchange of 6β Br by Cl, 245
action of $SOCl_2$ on, 245
Cholesterol, content in turtle corpus luteum, 483
Competitive protein binding, analysis of pregn-4-en-11β,
17α,21-triol-3,20-dione and pregn-4-en-17α,21-diol-
3,11,20-trione, 497
Corpus luteum, conversion of cholesterol to progesterone
in turtle, 483
Corticoid 17-mono esters, 443
Corticosterone, values in preweanling rats, 433

Dehydroepiandrosterone sulfate sulfatase, in human prostate, 646
Digitoxigenin-^{3}H, 87
Digitosigenin, 5-Hydroxy, 87
3-Digitoxigenone, 87
Dehydrotestosterone, in plasma, effect of ACTH, 553

Epi-testosterone, measurement in urine, 409
Epididymis, androgen binding proteins in, 457, 593
metabolic conversion of ^{3}H-testosterone *in vivo*, 773
12α,17[1]-Epoxy-17α-methylprogesterone, synthesis of, 857
Estradiol, binding to plasma protein, 249
factors involved in production of antibodies to, 259
incorporation into brain, 219
plasma levels, response to HCG, 583
Estradiol-17α, estimation of, in ruminant plasma, by competitive
protein-binding assay, 565
Estradiol-17β, estimation of, in human and ruminant plasma, by
competitive protein-binding assay, 565
Estra-1,3,5(10)-trien-3,17β-diol,
effect on rat prostate, 537
specific antisera for, 755
Estra-1,3,5(10)-trien-2,3-diol-17-one,
conversion to a phenazine derivative, 689
determination in pregnancy urine, 665
stability under conditions of conjugate hydrolysis, 665
synthesis of, 205
Estra-1,3,5(10)-trien-2,3-diol-17-one-6,7-$^{3}H_2$-4-^{14}C,
synthesis of, 205
Estra-1,3,5(10)-trien-3,4-diol-17-one,
synthesis of, 205
Estra-1,3,5(10)-trien-3,4-diol-17-one-6,7-$^{3}H_2$-4-^{14}C,
synthesis of, 205

Estra-1,3,5(10)-trien-3-ol-17-one,
specific antisera for, 755
Estra-1,3,5(10)-trien-17β-ol-[2,3-b]-quinoxaline,
preparation of, 689
Estra-1,3,5(10)-trien-17-one[2,3-b]-quinoxaline,
preparation of, 689
Estra-1,3,5(10)-triene-2,3,17β-triol,
conversion to a phenazine derivative, 689
Estra-1,3,5(10)-trien-3,4,17β-triol,
synthesis of, 205
Estra-1,3,5(10)-trien-3,4,17β-triol-6,7-$^{3}H_{2}$,-4-^{14}C,
synthesis of, 205
Estra-1,3,5(10)-trien-3,16α,17β-triol,
specific antisera for, 755
Estra-1,3,5(10)-trien-2,3,16α-triol-2-methoxy-17-one,
isolation from bile, 123
Estr-4-en-17α-ethynyl-17β-ol-3 one (norethindrone),
inhibition of estradiol uptake in rat tissues, 133
Estriol,
determination in cord plasma, 347
factors involved in the production of antibodies to, 259
Estrogen, biosynthesis by chimpanzee placenta, 233
Estrogens,
biosynthesis of B-ring unsaturated, 47
inhibition of, on serum FSH and LH levels, 703
oxidation with potassium nitrosodisulfonate, 205
Estrone,
estimation of, in human and ruminant plasma, by
competitive protein-binding assay, 565
plasma levels, response to HCG, 583

Fertility inhibition, polymer vaginal devices, 325
Fetal steroids,
in adrenal tissue, 511
in liver tissue, 511
FSH, serum level, effect of steroids and prostaglandins on, 703

Guinea-pig placenta and fetal adrenals, 813

18-hydroxydeoxycorticosterone, incubation with human
adrenal glands, 617
17α-Hydroxymethyl steroids, 3,20-oxygenated, 857
3α-Hydroxysteroid dehydrogenase, in adult rat brain, 633
Δ^{6}-5α-Hydroxy steroids, allylic rearrangement of, 47

Interconversion, prednisone to prednisolone, 833

Kidney, Mouse, 95

LH, serum level, effect of steroids and prostaglandins on, 703
Luteinizing H., in serum, effect of ACTH, 553
17,20-lyase, steroid, activity of, from rat testis, 785

Metabolism, of androgens, *in vivo*, 773
    of steroids (C_{19}), by guinea pig placentas, 813
16α-methyldichlorisone-17-butyrate, 443
17α-Methyl steroids, functionalization of the
  17-methyl group, 857
Microsomes, from rat testis, 785

19-Norsteroids, 17α-ethynyl, inhibition of estradiol
  uptake in rat tissues, 133

Oral anti-inflammatory action, prolonged, 443

Phosphatases, 95
Placenta, chimpanzee, biosynthesis and metabolism of
  progesterone and estrogens, 233
Potassium nitrosodisulfonate, preparation of
  catechol estrogens, 205
Prednisolone, radioimmunoassay of, 833
Prednisone, radioimmunoassay of, 833
5α-pregna-2,7-dien-6-one-20β-acetoxy, from pregnenolone, 609
5β-pregna-3α,20α-diol, acid hydrolysis of, 193
    in urine, 193
Pregna-3α,20α-diol-3α-sulfate, acid hydrolysis of, 193
Pregnancy urine, quantitative determination of Estra-1,3,5(10)-
  2,3-diol-17-one in, 665
Pregnanediol-3α-glucuronide, acid hydrolysis of, 193
Pregn-4-en-11β,21-diol-3,20-dione-18-al, 383, 397
Pregn-4-en-11β,21-diol-3,20-dione-18-al,11,18-hemi-
  acetal of, 169
Pregn-4-en-17α,21-diol-3,11,20-trione, levels in umbilical
  cord plasma and maternal plasma of normal pregnancies, 497
Pregn-4-en-3,20-dione, 1
Pregn-5-en-3β-ol-20-hydroperoxides, 521
Pregnenolone, conversion to 5α-pregn-2,7-dien-6-one,20β-
  acetoxy, 609
Pregn-5-en-3β-ol-20-one, in fetal adrenal and liver tissue, 511
Pregn-4-en-17-ol-3,20-dione, antisera properties of, 847
Pregn-4-en-11β,17α,21-triol-3,20-dione, levels in umbilical
  cord plasma and maternal plasma of normal pregnancies, 497
Pregn-4-en-16α,18,21-triol-3,20-dione, identification of, in
  human adrenal incubations, 617

Preputial glands, metabolism of androgen, 307
Preweanling rats, adrenal function, 433
Progesterone,
binding plasma protein, 335
biosynthesis and metabolism by chimpanzee placenta, 233
competitive protein binding assay of, 335
determination in cord plasma, 347
properties of antisera, 847
synthesis from cholesterolby corpus luteum, 483
Prostaglandins, inhibition of, on serum FSH and LH levels, 703
Prostate,
estradiol treatment on testosterone metabolism, 537
human, $DHEASO_{4ase}$ in, 646
reduced androgen receptor capacity in rat, 801
Protein binding assay, of progesterone without chromatography, competitive, 335
Protein binding, competitive, 27
Protein binding, of androgen, 593
Pubertal changes, 17
Puberty, and androgens, 17

Radioimmunoassay, of,
aldosterone, 169
Androst-4-en-3,17-dione, 111
prednisolone, 833
progesterone, 1
testosterone, 735
urinary testosterone glucuronoside, 285
Radiotracer techniques, 219
Rats, adrenal function of, 433
Ribonucleases, 95
Ruthenium tetroxide oxidation, 457

Sebaceous glands, 307
9,12-Seco-11-nor steroids, functionalized in positions 3, 9, and 12 of, 147
9,12-Seco-11-nor steroids, functionalized in positions 3, 9, 12, and 20 of, 361
Spironolactone, mechanism of, 383
Steroid biosynthesis (C_{19}), by fetal guinea pig adrenals, 813
Steroids, C_{19}, antigens, 723
Steroids,
in fetal liver, 511
in fetal adrenal tissue, 511
Steroids, C-21, inhibition of, on serum FSH and LH levels, 703
Steroids, C_{19}, protein conjugates, 723
Steroid sulfates, determination in cord plasma, 347
Subcellular particles, homogenate, 95

Testis,
androgen transport in, 593
cytosol fraction of rats, 457
Testosterone, 27, 95
binding to human pregnancy plasma proteins, 423
in blood, 409
in plasma, effect of ACTH, 553
in urine, 409
plasma levels, response to HCG, 583
transport of in rat testis and epididymis, 593
Testosterone, 18-methyl-17α-ethynyl-19-nor, (norgestrel),
inhibition of estradiol uptake in rat tissues, 133
Tetrahydroaldosterone, 383, 397
Tissue digestion in the assay of radioactivity, 219

Vaginal devices, polymer,
steroid release from, 325
effect on fertility inhibition, 335
